

IQeye HD1080p Series

HD Megapixel High-Performance Camera

PRODUCTS

True High-Definition Video

Enjoy true HD quality and high performance at 30 frames per second with the IQeye HD1080p Series. Crystal-clear images, network reliability and compression/bandwidth management deliver unparalleled video.

Simultaneous H.264 and MJPEG Streams

Simultaneous streaming of both H.264 and MJPEG compression enables you to optimize for any application.

True Day/Night Surveillance

The IQeye HD1080p Series offers TRUE day/night performance for the most challenging environments. It's the best choice when you need clear crisp HD video in low light. The camera automatically senses low-light levels and switches from color to black and white.

Analog Out

The IQeye HD1080p features analog video out for easy focusing.

IQeye HD1080p network cameras deliver spectacular high definition progressive scan video for your surveillance, marketing and web attraction applications.

Available in standard and day/night configurations, the IQeye HD1080p cameras offer cutting edge H.264 performance in a classic, full-featured, ruggedized camera package. Its energy efficient design is PoE ready and can also be powered directly by AC or DC for redundancy. Its energy efficient design is PoE ready and can also be powered directly by AC or DC for redundancy, and its analog video out makes focusing simple.

Camera weight (without lens): 13oz (369g)
