

# SECURE EVERY CORNER WHERE THE SUN SHINES

Dahua Integrated Off-grid Security

4G Wireless  
Transmission

Integrated  
Structure

Long  
Standby Time

All-weather  
Operation

Mobile App  
Real-time Monitoring

## Overview

Security monitoring is gradually influencing all aspects of people's life. Nevertheless, deployment of monitoring devices in some scenarios cannot be fully realized due to limitations in power supply and network conditions. The Dahua Integrated Off-grid Security Solution combines 4G network transmission technology, video surveillance (including AI functions), and solar power technology to form an integrated off-grid monitoring system. It is suitable for environments with no access to electricity and network connection, providing users with a comprehensive, accurate and intelligent monitoring solution.

## Highlights

- No extra network cable and power cord connection required
- Integrated structure, convenient installation and deployment
- Excellent performance and long standby time
- High protection, all-weather operation
- Mobile terminal display and remote maintenance

## Recommend Products

### PFM378-B60-W

- Integrated design, easy to install
- Supports wall mount and pole mount with PFA150 bracket
- Flexible angle adjustment of the solar panel and the camera
- 60 W monocrystalline solar panel
- Sturdy built to resist storms with sustained winds up to 117 km/h
- Remote monitoring available through the mobile app
- MPPT charging controller
- RS-485 communication
- Electric protection

### PFM378-B125-CB

- Integrated design, easy to install
- Flexible angle adjustment of solar panel and camera mount
- 125W monocrystalline solar panel
- Aluminum alloy frame
- Sturdy built to resist storms with sustained winds up to 117 km/h
- Remote monitoring available through the mobile app
- MPPT charging controller
- RS-485 communication function
- Electric protection

## Application Scenarios

Orchards

Fish Ponds

Construction Sites

Sports Venues
